EXAMINER'S AMENDMENT

1. The application has been amended as follows:

The abstract has been replaced with

-- A dry cleaning process for in-home dry cleaning comprising a dry cleaning step of contacting a laundry article stained with particulate soil with a dry cleaning composition wherein the liquor to cloth ratio (w/w) (LCR) is at most 20, and wherein the composition comprises a) a non-flammable, non-chlorine containing organic dry cleaning solvent; b) a cleaning effective amount of an acid surfactant. --

STATEMENT OF REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

The most pertinent prior art references known to the Examiner are listed on the attached forms PTO-892 and newly submitted 1449. The claims in their present amended forms have overcome the closest prior arts of record - Evers et al., Perry et al. in view of Goedhart et al. Giampalmi et al., Baran et al., Flynn et al. and Zyhowski et al. - because none of them teaches, discloses or suggests a dry cleaning process for in-home dry cleaning **consisting of** a low-aqueous step followed by a subsequent non-aqueous step with specific compositions, ingredients and ratio as disclosed by the applicants. In the art of dry cleaning, Evers et al. disclose a dry cleaning process with various low-aqueous and non-aqueous steps; Perry et al. teach the process of dry cleaning with low aqueous composition; Giampalmi et al. teach the dry

Art Unit: 1796

cleaning process with three separate and distinctive steps of an aqueous step, a non-aqueous step and a low aqueous step and Baran et al., Flynn et al. or Zyhowski et al. teaches a non-chlorine, non-flammable organic dry cleaning solvent. However, none of the prior art of record provides sufficient suggestion or motivation to have a dry cleaning process **consisting of** a low-aqueous step followed by a non-aqueous step with each step featuring the ratio and ingredients within the proportions as taught by the applicants. Accordingly, the claimed invention, as a whole, would not have been obvious to one of ordinary skill in the fiber treatment art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to TRI V. NGUYEN whose telephone number is (571)272-6965. The examiner can normally be reached on M-F 8:00 AM to 5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vasu Jagannathan can be reached on (571) 272-1119. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
